WELCOME TO SMARTER  
**Commercial Security**

# MULTIPLE LOCATIONS.

## One view.

Manage intrusion detection, energy use, access and video systems across every business location in real time from a single, intuitive interface: The Enterprise Dashboard.

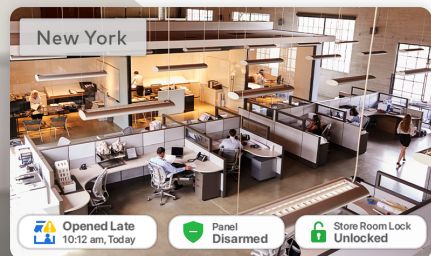

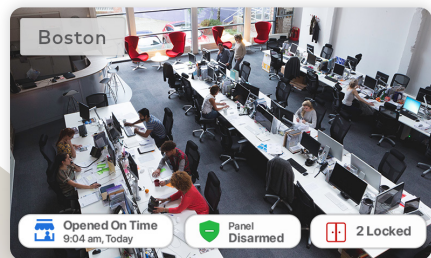

View real-time status of properties, filtered by arming state, open/close time and access state.

Organize locations into a top-down hierarchy of groups or regions, instead of managing locations separately.

Save time and increase consistency with global management of user codes, access permissions and system settings.

Ensure consistent security across all locations with automatic software updates, end-to-end encryption and two-factor authentication.

Schedule multi-site roll-up reports to get actionable insight across all properties automatically.

DETAILED AND TIMELY

# Operational Insights & Awareness

See critical information from multiple locations with daily, weekly and monthly reports.

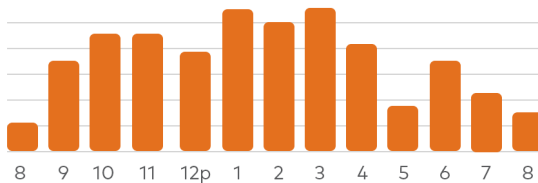

Get real-time notifications if employees open late or close early.

Gain awareness and evidence of activity in sensitive or restricted areas.

See graphs of your busiest times of day to help inform staffing decisions and track the impact of promotions.

| Thur 1/30 4:21 pm | North Door (Sensor 9) Offline |

# A NEW WAY TO Monitor Your Business

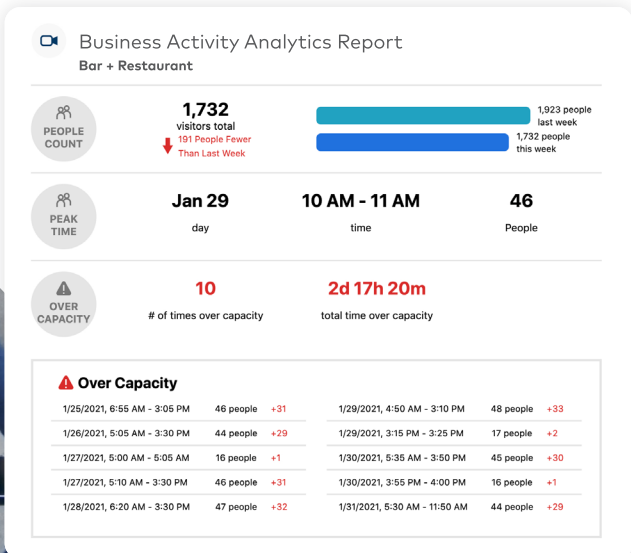

Transform the way you protect your business with Business Activity Analytics. This powerful feature uses your business cameras to monitor traffic flow and the movement of people across multiple locations to help you make informed decisions.

Determine total net occupancy at any given time with multidirectional counting

Use heat maps to track and visualize where people spend the most time within an area during a specified date or time range

Count how many people are in a defined area at any given point and get alerts when too many people are in one place

Measure average customer wait time and get alerts if the queue length or average wait time exceeds preset limits

# BEST-IN-CLASS Intrusion Detection

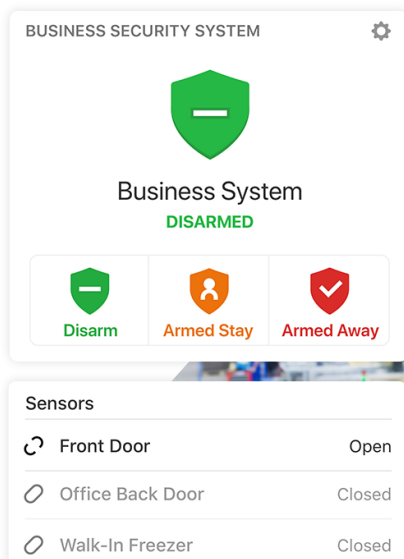

Keep your locations, inventory and equipment protected 24/7 with intelligent, automated security.

Create and delete user codes instantly. Manage your monitoring station emergency contact list directly from the Alarm.com app or website.

Auto-arming and dual path communication ensure that your property never gets left unprotected.

Receive video alerts when an alarm is triggered. Quickly cancel or verify alarms right from the alarm.com app.

Keep your system safe with robust data and network security, including end-to-end encrypted traffic and two-factor authentication.

# CLOUD-MANAGED Video Surveillance

24/7 on site recording, cloud event storage, health monitoring, and intelligent analytics ensure that your footage is always available when you need.

Install or use existing third-party cameras that work for you while still getting the benefit and capabilities of the Alarm.com platform.

Automatically capture and store footage of alarms and arm/disarm events in secure, offsite cloud servers.

Perimeter detection analytics accurately detect people and vehicles entering your property, while filtering out unimportant motion like rain or shadows.

24/7 video health monitoring ensures that cameras are always online and recording with unobstructed views.

Deter potential intruders with Perimeter Guard's™ loud whistles, beeps, and flashing red light.\*

*\* Available on compatible cameras.*

a clip.

## STREAMLINED Access Control

Combine intuitive, cloud-based user management with seamless alarm and video integration in a scalable solution.

Use the Alarm.com Cell Connector to bypass the need for a network connection and reduce installation hassles when unique access control setups are present.

Increase efficiency by bulk-adding hundreds of users at once or setting cards to automatically deactivate on a certain date.

Adapt your system to your needs for enhanced security and convenience: activate a siren at the touch of a button, open a gate from the app, and so much more.

Lock, unlock and buzz doors open from anywhere with your mobile app.

Reduce false alarms by setting your intrusion panel to automatically disarm when the first person accesses a door.

Find video of access events instantly from your access history timeline.

**Save time and money with the Mobile Credentials feature,  
which allows users to use their smartphones to access buildings.\***

\* Mobile Credentials is exclusively supported by Alarm.com Access Control Readers only.

# INTELLIGENT Energy Management & Temperature Monitoring

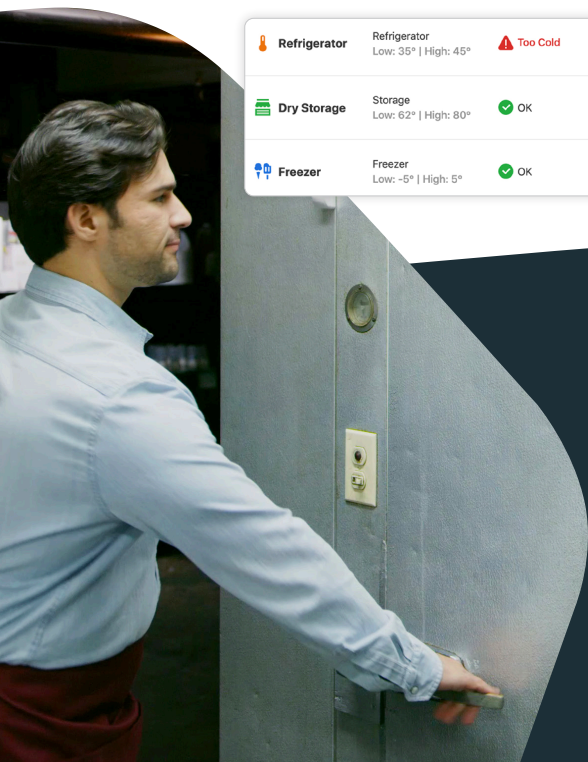

View, manage and control temperatures, set points, and local thermostat access across multiple locations.

Automate your thermostat schedules and save money with Smart Away Mode, which automatically adjusts temperatures when systems are armed and employees leave.

Track temperatures of critical assets like walk-in refrigerators and data closets. Receive alerts if temperatures exceed a set range.

Cellular communication and long battery life ensure that critical temperatures are monitored, even if the property loses power or internet.

Retrieve historical reports summarizing temperature conditions for compliance.

|                                                                                                       |                                      |                                                                                                   |     |

# Connected Fleet

A cloud-based fleet management system

 **ALARM.COM**  
for BUSINESS

# Security Beyond Four Walls

Whether you're in the office or on the go, Connected Fleet easily manages your commercial vehicles while getting real-time data and actionable business insights—all from the Alarm.com for Business platform.

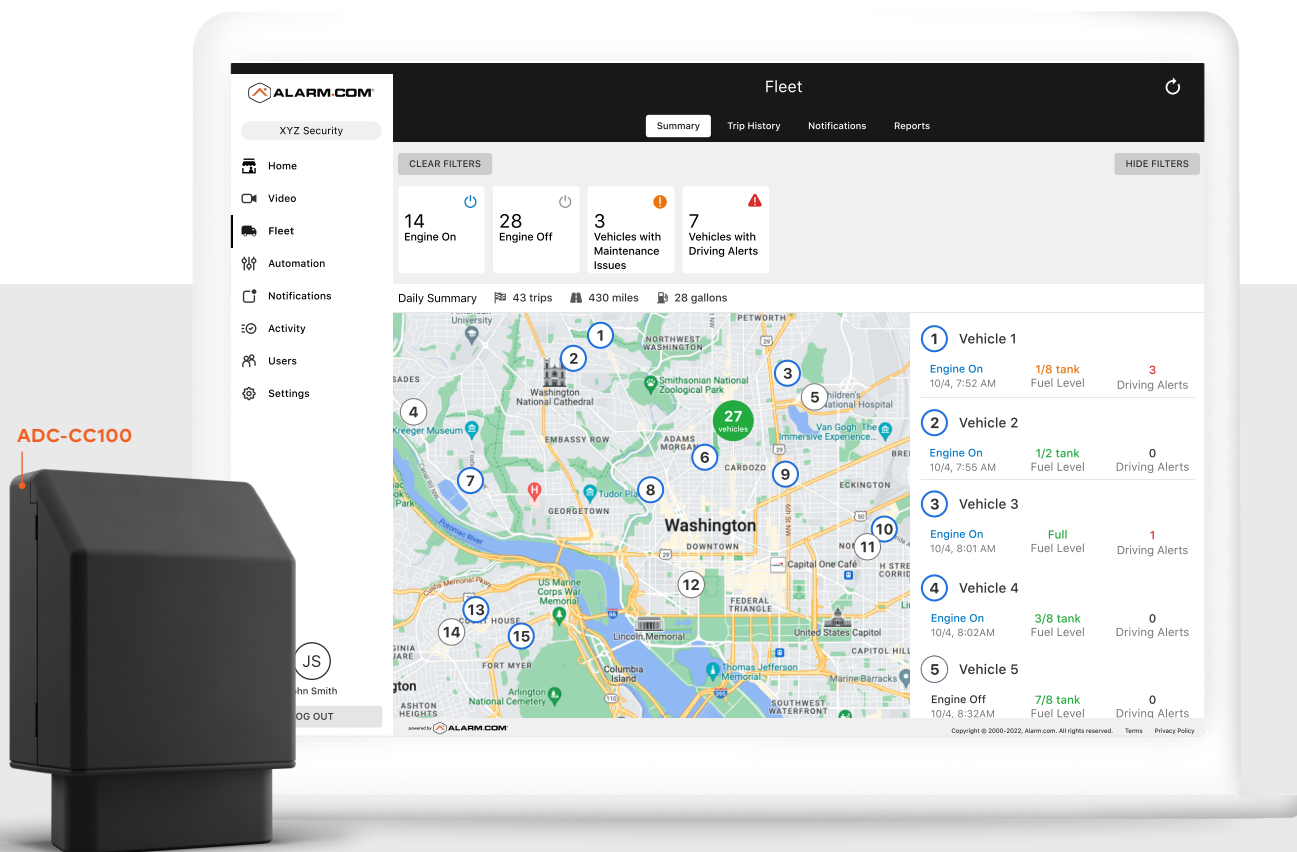

## Features

### Easy to install, easy to connect

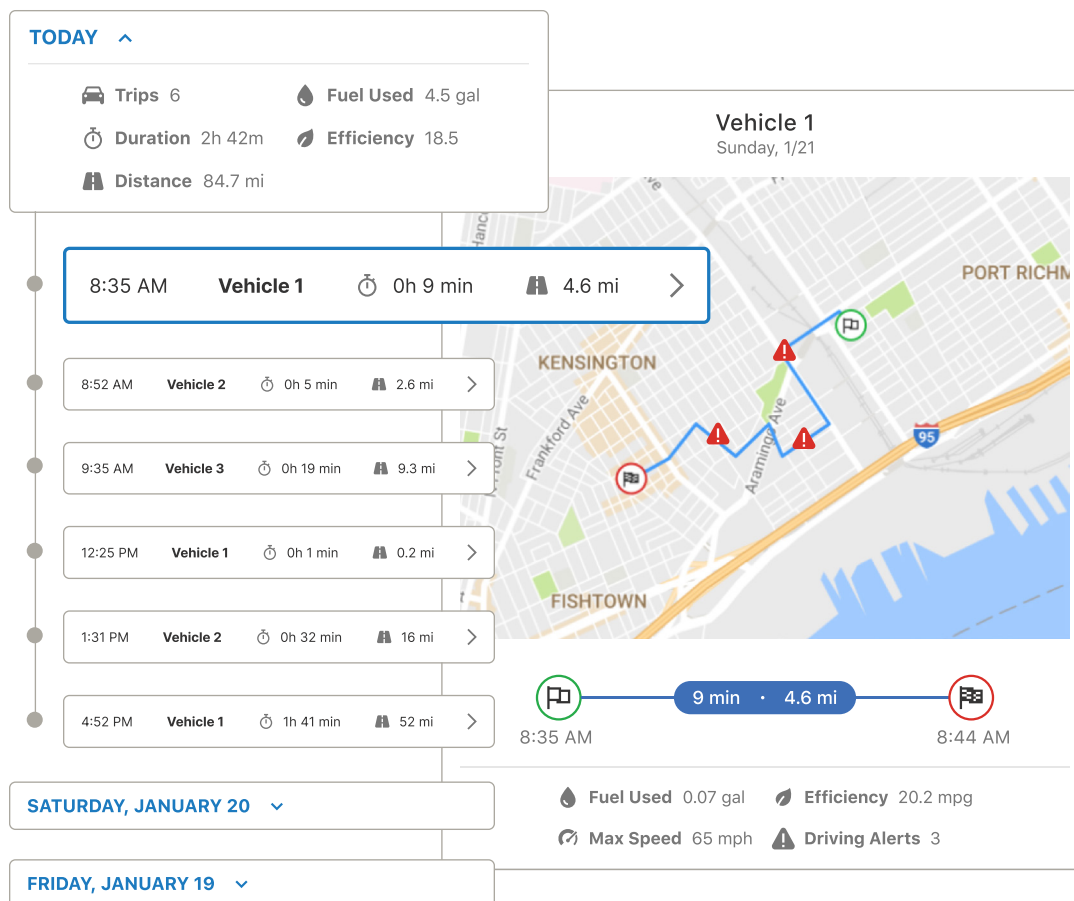

Install Connected Fleet\* in seconds—just plug the Car Connector (ADC-CC100) device into your vehicle's OBD-II port. Connected Fleet uses reliable cellular signaling, making sure your vehicles are online wherever they go.

### Scale to fit your business

No matter what size your business, Connected Fleet adapts to your needs. Providing 24/7 security and management solutions for up to 100 vehicles per location, Connected Fleet can scale to thousands of locations per customer, making it a perfect solution for small, mid-sized, and large businesses.

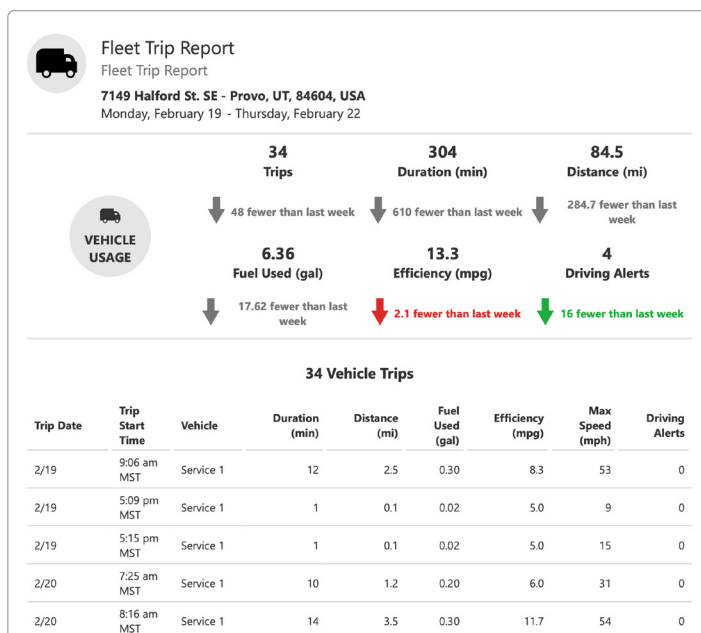

\*Requires Alarm.com's Car Connector device and a service plan.

## Fleet Trip Reports

Get reports on demand for a breakdown of your fleet operations—or have them sent to your email automatically on a monthly, weekly, or daily basis.

### Driver behavior

Monitor driver behavior by receiving alerts for:

- + Excessive speed
- + Hard braking
- + Sudden acceleration

### Trip data

Receive Fleet Trip Reports that include:

- + Start time of trip
- + End time of trip
- + Trip duration
- + Distance traveled
- + Fuel consumed
- + Max speed
- + Summary of driver behavior

### Vehicle status and health

Check in on vehicles with alerts and dashboards for:

- + Fuel level overview and low fuel
- + Low battery
- + Diagnostic Trouble Codes (DTC)
- + Unexpected movement
- + Last known vehicle location

# Food and Beverage Security Solutions

From grab-n-go markets to multi-chain restaurants, food and beverage businesses face similar challenges with protecting temperature-sensitive inventory, managing employee access and monitoring multiple locations. Alarm.com for Business has the technology to address all this and more with our unified commercial security platform.

## WHAT MATTERS MOST

### Monitoring Temperature-Sensitive Assets

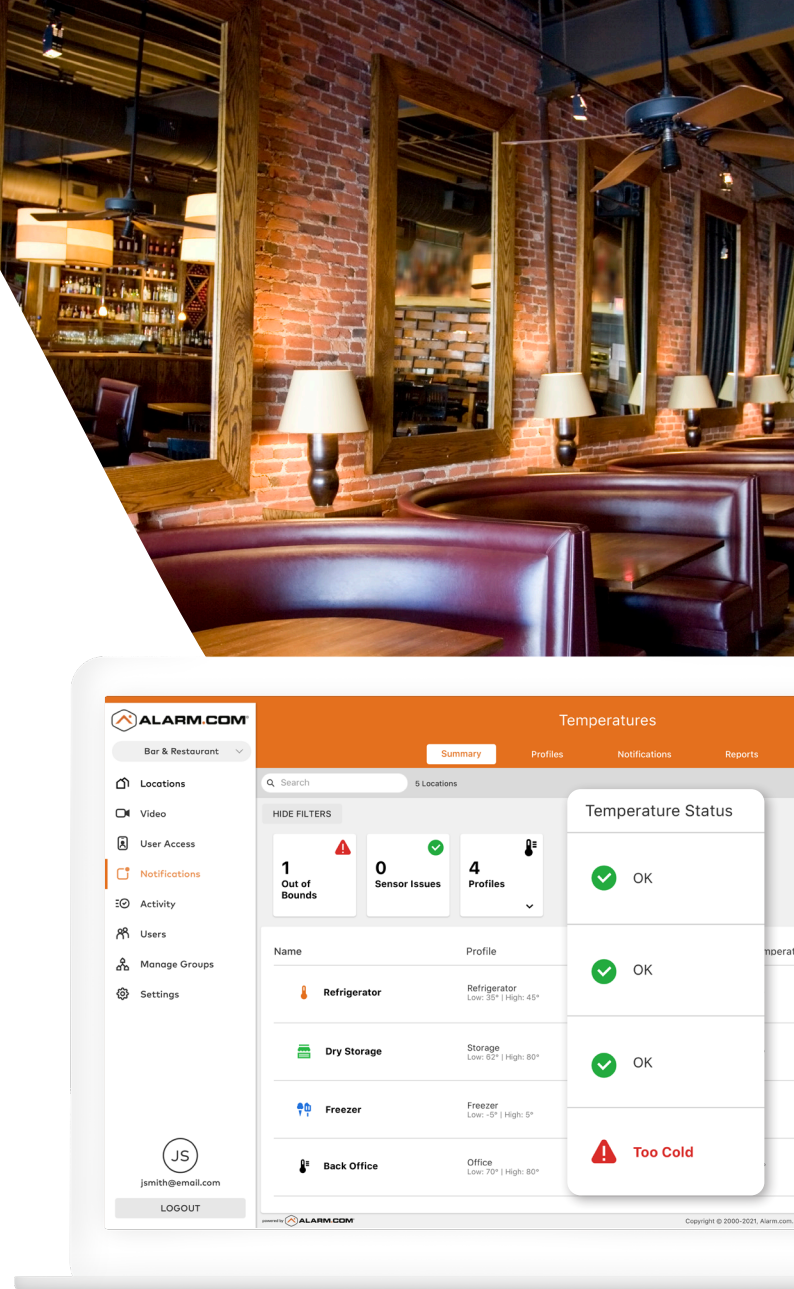

Keep an eye on storage areas that contain temperature-sensitive items and take action right away to prevent loss.

### Keeping Tabs on Occupancy and Wait Times

Rely on the most reliable system to intelligently manage crowds, monitor customer foot traffic and track average wait times.

### Managing Employee Access

Explore more efficient and effective ways to manage numerous employees accessing multiple locations.

On average, food and beverage businesses have a total of 16 areas using temperature monitoring systems that are checked daily.<sup>1</sup>

Our 24/7 monitoring, real-time alerts, and historical temperature reports offer an ideal service for single and multi-location business properties.

<sup>1</sup> DYNATA, Alarm.com SMB Brand Tracking Survey - December 2020

To learn more about how Alarm.com for Business can secure your food and beverage business, visit [alarm.com/commercial-business](https://alarm.com/commercial-business).

## A SOLUTION FOR ANY APPLICATION

### Smarter Business Temperature Monitoring

Prevent inventory loss due to a power outage or freezer doors left ajar and take action when temperature sensors alert you in real-time of temperature changes.

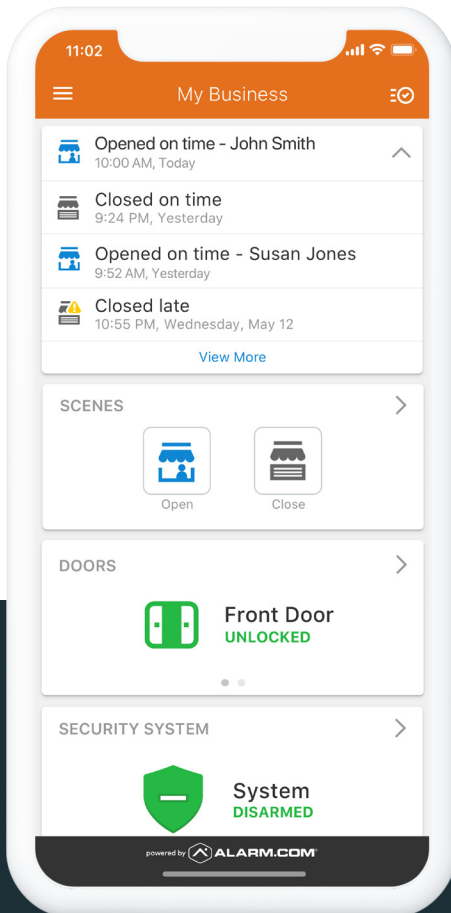

### Employee Management

Employees opening late and closing early costs businesses over \$500 per year.<sup>2</sup> Bulk manage employee access to save time and increase consistency.

### Optimize Your Operations

With Business Activity Analytics, keep tabs on occupancy numbers and set capacity alerts to manage staff count and keep people safe.

## EYES ON EVERY LOCATION

### An All-In-One Solution

Keep track of it all on a single, intuitive interface with the Enterprise Dashboard and view footage of your properties from anywhere, anytime with the easy-to-use mobile app.

### You're in good company

More than **600,000** businesses rely on Alarm.com for Business technology to protect properties, people, inventory, and more.

Among food and beverage businesses, **47%** watch live video feeds on-site using a monitor and **36%** remotely watch live views using a smart phone or tablet.<sup>4</sup>

Rely on commercial video surveillance to view live footage of multiple locations from anywhere, anytime on the Enterprise Dashboard.
