

Home Security That's Not Just Smart, It's Genius

Discover connected solutions that turn your house
into a secure and safe haven.

Protect What Matters Most

How savvy is your home security? With Alarm.com's cutting edge technology, your home is continuously connected to state-of-the-art, professionally monitored security that's on alert 24/7. So, you can be confident your household is safe, secure, and running smoothly, no matter where you are.

Dependable and easy to use, an Alarm.com solution offers everything you need—especially the peace of mind that comes from a customized security system installed by trusted experts. Make your home not just smart, but genius.

5-Part Harmony— Everything Works Together

An Alarm.com system seamlessly integrates products and functions. This means they speak to each other, work together and are always connected, making it easy to spring into action.

Thermostat
Set to 72°F

Front Door Camera
Detects a Person

Security & Safety

Our security panels centralize communication channels like Wi-Fi and cellular, with Crash & Smash Protection that contacts your monitoring station even if an intruder destroys the hardware.

Video Monitoring

Indoor and outdoor cameras learn your household habits and can alert you to unusual activity. Wireless and touchless doorbells let you see, hear, and do more at your front door—or at any door.

Access Control

Door hardware, smart locks, and garage door controllers work together to ensure that you have full control over who can enter or leave your home.

Energy Management

Smart thermostats, sensors, lights, outlets, solar monitoring, and more all team up to save energy and empower you to customize your space for maximum comfort.

Home Automation

Devices communicate with each other to automate the management of your home and anticipate your household needs, ensuring things run smoothly.

Our Privacy Pledge

We respect your privacy and don't sell activity data from your home or business.

Connection That Puts Technology to Work for You

True security goes beyond just preventing break-ins. It's about creating a seamless connection to every part of your home. This not only safeguards your home, it saves you worry, time, energy and money.

Receive alerts and take action from wherever you are:

- + System armed
- + Door left unlocked
- + Garage door open
- + Motion inside or outside the home
- + Visitor at front door
- + Smoke or CO detected
- + Water detected
- + Unexpected entry into home

The next-generation Alarm.com Video Analytics Doorbell gives you instant front door awareness. Whether you're on the go or on the couch, you'll always know when someone's at your door.

Perimeter Guard® proactive defense uses Video Analytics to identify an intruder on your property then delivers sound warnings and flashing LEDs, floodlights, and red and blue warning lights that stop them in their tracks.

Protect your home day and night with the Alarm.com Floodlight Camera. When motion is detected, choose from several responses, including full floodlight, red and blue deterrent lights, and a powerful siren.

One App

Alarm.com integrates all your devices in a single app so you can view and control your system from the palm of your hand. The easy-to-navigate dashboard makes it simple to arm and disarm your panel, adjust lights, locks, temperature and so much more.

Video Analytics

Get smarter about video monitoring, indoors and out. Our video cameras can detect whether objects are people, vehicles, or animals and following your custom rules, can learn your home's patterns.

Proactive Alerts

Get the ones that count. With our customizable notifications, you can filter out unnecessary alerts, keeping you informed about unexpected activity without overwhelming you.

Create a Fully Connected & Integrated System

While each is powerful alone, our products and features are even better when they work together. With Alarm.com it's easy to set up a fully customized solution that makes your life easier.

Intuitive Scenes

Alarm.com Scenes allows you to run multiple smart home functions at the same time. With the tap of a button within the app, you can take action across multiple devices.

Intelligent Notifications

Stay informed with unexpected activity alerts that matter most to you. Set personalized alerts to be notified when the garage door is left open, doors are left unlocked, or unusual activity is detected.

Custom Rules & Schedules

With rules and schedules, you can save time and money while keeping your property secure. Set preferences for securing settings, thermostats, lights, and even music.

Energy and Home Automation

Every home has its daily routine, like thermostats to increase comfort and lighting to relax. We provide solutions that connect it all for true whole-home management.

Smart Thermostats

With convenient schedules and room-by-room precision comfort, you can curate the perfect environment.

Lights

Indoor and outdoor lights can be triggered by a camera, voice command, and more to deter unwanted visitors.

Awareness That Goes Where You Need It

With Alarm.com you can practically be everywhere at once. Life doesn't stop at your property line, and neither does security and home management.

Alarm.com Places

The Alarm.com app uses your phone's location to see when you're headed home and takes action like switching on lights and adjusting temperature. It can also detect when you left and if you forgot to lock up.

Connected Car

Get maintenance alerts before someone gets stranded. Track the location if a car is stolen or you can't remember where you parked. And keep an eye on young drivers and their habits on the road.

Unexpected Movement: Sam's Truck left Home at 3:43 am on Saturday, April 7.

Flex IO™

These aren't just any security system sensors. Our award-winning Flex IO is battery-powered, weatherproof, and works without a panel, hub, or even Wi-Fi—perfect for, pools, sheds, boats, and other more remote spots.

FLEX IO SENSORS

Storage Shed

Driveway Gate Closed

Barn Door Closed

Smart Water

Sensors and valves alert to possible leaks—some allowing for remote shutoff to prevent water damage.

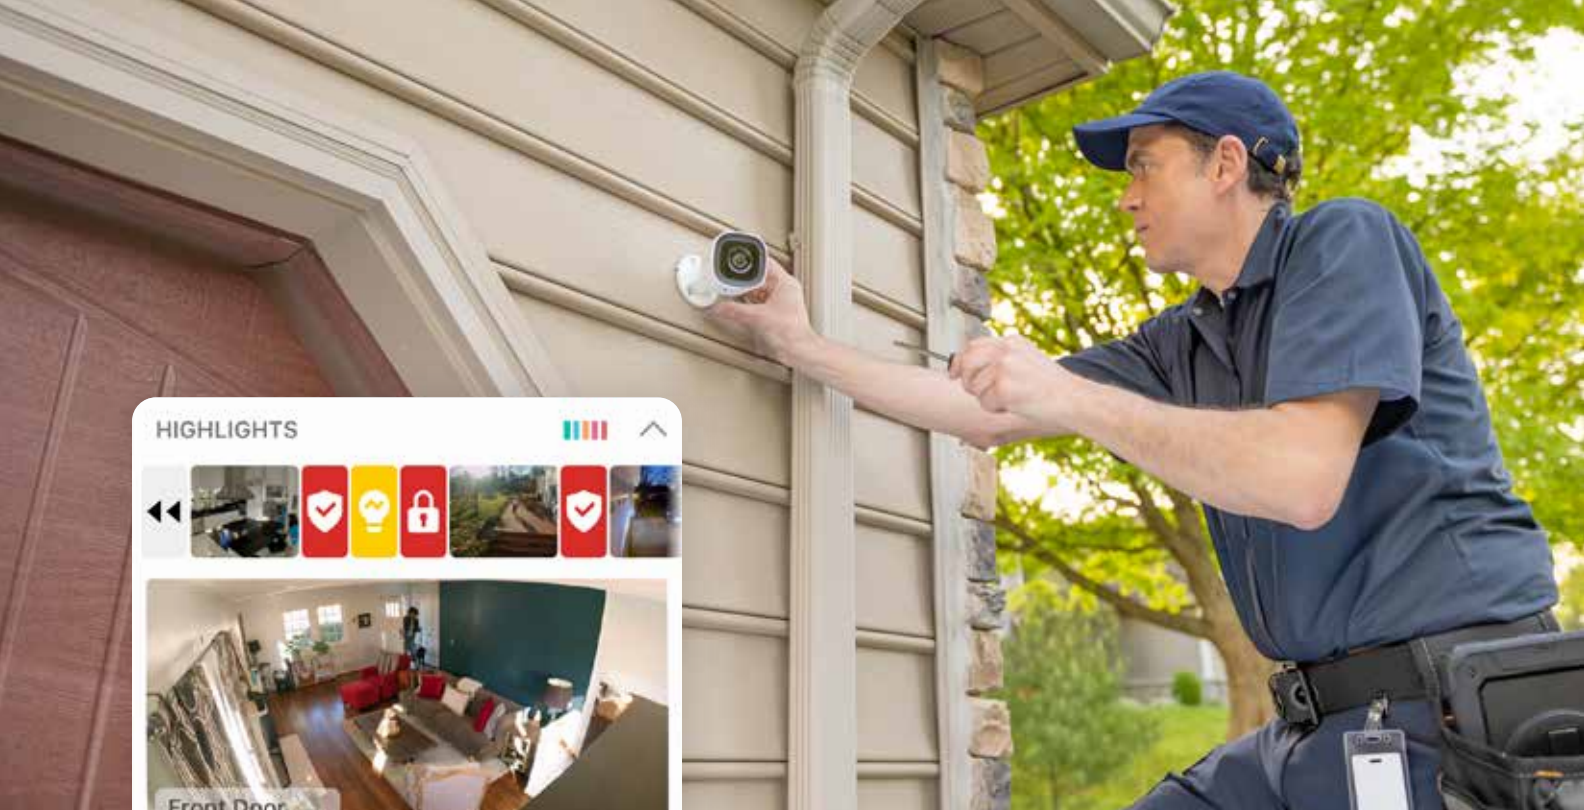

Shades

Manage your shades from the app for full control over your privacy and ambiance.

Solar Energy

Connect compatible solar panels to your system to monitor energy usage and production.

The Highlights feature provides insight into what's important so you can catch up with the day's events—in 30 seconds or less—right from your phone. It's a quick visual summary of moments that matter.

Smart Signal

Quickly cancel false alarms or verify the alarm to send emergency personnel—right from your phone.

Automatic Smart Arming

Deactivate your security system at a pre-set time or if motion is detected by your sensors.

Protection That Exceeds Your Expectations

Let our certified Alarm.com service providers do what they do best, so you can focus on the rest. Start with an Alarm.com system that's professionally installed and monitored to respond when it matters most.

Expert Installation

Whether you start small or start with it all, we'll configure a home security system that's right for you. Enjoy peace of mind with expert installation by a licensed service provider who knows how to get it right the first time.

Professional Monitoring

In an emergency, your monitoring service will alert first responders. And intruders aren't the only risk. If there's a fire or CO leak, your connected detectors will signal to send help your way.

Severe Weather Alerts

When nature is at its wildest, get advance notification of catastrophic events like fires, tornados, or tsunamis.

Unexpected Activity Alerts

Get notified when something unusual happens, like a teen coming home during the school day or a person on your property in the middle of the night.

Facial Recognition at Panel

Your system can identify when an unauthorized user is attempting to use your disarm code.
